

Vaelith Labs presents: GlyphTrace

The world's first debugger that remembers *why*.

Designed for CTOs, engineers, and forward-deployed R&D teams - GlyphTrace ensures that no change is ever made without context. Never lose sight of the *intent* behind evolution.

Engineered from recursive principles. Delivered as a standalone tool.

Price: \$10,000,000

Limited license: One-time activation per enterprise.
